Education

Sahyadri College of Engineering and Management **Expected Graduation, May 2026**

B.Tech in Computer Science - 6.05 CGPA *Mangalore, Karnataka*

- Concentrations: Infra, Cybersecurity , Software Development
- Related Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Object-Oriented Programming
- Learning about the digital infrastructure

Technical Skills

Languages: Python, JavaScript
Developer Tools: VS Code, Power BI, Excel, JIRA, VS Code, PyCharm, AWS
Operating Systems: Windows, Ubuntu, Linux

Projects

Server Monitoring in AWS | *AWS CloudWatch, CloudTrail, EC2, S3, IAM* **May 2025**

- Enhanced a **scalable AWS-based monitoring system** to **track server performance** and ensure infrastructure
- Integrated CloudWatch and CloudTrail for real-time logs and alerts.
- Optimized resource utilization and enhanced system reliability.

ML Crop Recommendation System | *Python, Random Forest, IoT, Data Analytic* **January 2025**

- Designed a predictive model to recommend crops based on soil, climate, and geolocation data.
- Integrated IoT sensor data for real-time analysis and improved accuracy.
- Enabled sustainable farming with data-driven decision support.

Mental Health Support & Therapist Matching Platform | *HTML, CSS, JavaScript,* **May 2024**

Node.js, Express.js, MySQL

- Created a full-stack web app for secure client-therapist matching with a focus on privacy and responsiveness.
- Implemented backend authentication, session handling, and database management.
- Delivered an intuitive interface with mobile-friendly design.

Sales Performance Analysis Dashboard | *Power BI, Excel, SQL, Python* **May 2024**

- Developed dashboards to analyze KPIs, revenue trends, and top-performing products.
- Used SQL and Python for data preprocessing and cleansing.
- Enabled real-time insights that supported key business decisions.

Hackathons & Competitions

Ainnovation 2025 II – Code4Bharat (24-hour Hackathon) · Finalist **September 2025**
NMAM Institute of Technology, Karkala

IoT-Based Real-Time Health Monitoring System on Azure | IoT Sensors, Python, Azure IoT Hub, SQL Database, Power BI

- Developed a real-time health monitoring system using IoT sensors and Python.
- Integrated with Azure IoT Hub and SQL Database for reliable data storage and management.
- Built live Power BI dashboards to visualize health metrics and generate insights.

Certification

Microsoft Certified: Power BI Data Analyst Associate **June 2025**
- **Microsoft**

Excel with Copilot: AI-Driven Data Analysis **November 2024**
- **Coursera by Google**

Generative AI Productivity Skills **November 2024**
- **Microsoft LinkedIn Learning**

Copilot in PowerPoint **November 2024**
- **Microsoft LinkedIn Learning**

AWS Certified Solutions Architect – Associate **October 2023**
- **Amazon Web Services (AWS)**

CompTIA Linux+ Course **July 2023**
- **Simplilearn**
