EDUCATION

Sahyadri College of Engineering and Management <i>B.E in Computer Science — CGPA: 6.5</i> – Areas of Interest: Cloud Computing, DevOps, Cybersecurity, Software Development – Relevant Coursework: Cloud Computing, Data Structures & Algorithms, Machine Learning, Artificial Intelligence, OOP	Mangalore, Karnataka <i>May 2026</i>
--	---

TECHNICAL SKILLS

Languages: Python, JavaScript
Cloud Platforms: AWS (EC2, S3, IAM, CloudWatch, CloudTrail), Azure IoT Hub
DevOps & Containerization: Git, GitHub, Jenkins, Docker, Kubernetes, CI/CD, Shell Scripting (Basics), Linux Server Deployment
Developer Tools: VS Code, PyCharm, JIRA, Excel
Operating Systems: Windows, Linux
Domains: DevOps, Cloud Computing, Cloud Infrastructure, CI/CD, Containerization, Cloud Automation, IoT, Data Annotation

EXPERIENCE

AI Ops Intern (Data Annotation) <i>Xtransmatrix</i> – Performed data annotation and labeling for AI/ML models, directly contributing to improved model accuracy. – Processed and organized large-scale datasets for training and validation pipelines. – Ensured data quality and consistency across annotation tasks through systematic QA reviews. – Collaborated cross-functionally to optimize annotation workflows and reduce turnaround time.	Nov 2025 – Apr 2026 <i>Onsite</i>
---	--------------------------------------

PROJECTS

End-to-End DevOps Pipeline – Built and deployed a complete DevOps pipeline on AWS using Git, GitHub, Jenkins, Docker, Kubernetes, and Linux. – Automated the build and deployment process with Jenkins, reducing manual work and improving deployment speed. – Containerized applications using Docker and managed deployments through Kubernetes for better scalability and reliability. – Hosted applications on AWS EC2 instances with hands-on experience in CI/CD, container orchestration, and cloud infrastructure.	Dec 2025
Server Monitoring in AWS – Built a scalable AWS-based monitoring system for tracking server performance using EC2, S3, and IAM. – Integrated CloudWatch and CloudTrail for real-time log aggregation, alerting, and audit trails. – Optimized resource utilization, improving system reliability and reducing operational overhead.	May 2025
Mental Health Support & Therapist Matching Platform – Built a full-stack web application using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL. – Implemented secure user authentication and backend session management. – Designed a responsive, accessible UI to streamline therapist-client matching workflows.	May 2024

HACKATHONS & COMPETITIONS

AI Innovation Hackathon — Finalist IoT-Based Real-Time Health Monitoring on Azure – Developed a real-time health monitoring system using IoT sensors, Python, and Azure IoT Hub. – Integrated SQL Database for structured data storage and built Power BI dashboards for live visualization. – Reached finalist stage out of a competitive field, demonstrating end-to-end cloud and IoT expertise.	Feb 2025
---	----------

CERTIFICATIONS

AWS Solutions Architect — Associate Level	Simplilearn, Oct 2023
Introduction to Kubernetes	Simplilearn, Nov 2024
Fundamentals of DevOps On AWS	Simplilearn, Jul 2024
Microsoft Certified: Power BI Data Analyst Associate	Microsoft, June 2025
