EDUCATION

Sahyadri College of Engineering and Management

Mangalore, Karnataka

B.E in Computer Science — CGPA: 6.5

May 2026

- Areas of Interest: Cloud Computing, DevOps, Cybersecurity, Software Development
- Relevant Coursework: Cloud Computing, Data Structures & Algorithms, Machine Learning, Artificial Intelligence, OOP

TECHNICAL SKILLS

Languages: Python, JavaScript

Cloud Platforms: AWS (EC2, S3, IAM, CloudWatch, CloudTrail), Azure IoT Hub

DevOps & Containerization: Git, GitHub, Jenkins, Docker, Kubernetes, CI/CD, Shell Scripting (Basics), Linux Server Deployment

Developer Tools: VS Code, PyCharm, JIRA, Excel

Operating Systems: Windows, Linux

Domains: DevOps, Cloud Computing, Cloud Infrastructure, CI/CD, Containerization, Cloud Automation, IoT, Data Annotation

EXPERIENCE

AI Ops Intern – Xtransmatrix Consulting Private Limited

Nov 2025 – Apr 2026

Onsite

- Worked as an AI Operator Intern on a US-based Healthcare AI project, supporting Human-in-the-Loop (HITL) AI operations and machine learning workflows.
- Performed data validation, intent classification, AI response verification, and quality assurance to ensure high data accuracy and compliance.
- Analyzed AI-generated outputs, identified anomalies, and followed structured SOPs while working with real-world conversational AI datasets.
- Gained hands-on experience with production-level AI systems, maintaining data quality, confidentiality, and process discipline in a client-focused environment.

PROJECTS

End-to-End DevOps Pipeline

Dec 2025

- Built and deployed a complete DevOps pipeline on AWS using Git, GitHub, Jenkins, Docker, Kubernetes, and Linux.
- Automated the build and deployment process with Jenkins, reducing manual work and improving deployment speed.
- Containerized applications using Docker and managed deployments through Kubernetes for better scalability and reliability.
- Hosted applications on AWS EC2 instances with hands-on experience in CI/CD, container orchestration, and cloud infrastructure.

Server Monitoring in AWS

May 2025

- Built a scalable AWS-based monitoring system for tracking server performance using EC2, S3, and IAM.
- Integrated CloudWatch and CloudTrail for real-time log aggregation, alerting, and audit trails.
- Optimized resource utilization, improving system reliability and reducing operational overhead.

Mental Health Support & Therapist Matching Platform

May 2024

- Built a full-stack web application using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL.
- Implemented secure user authentication and backend session management.
- Designed a responsive, accessible UI to streamline therapist-client matching workflows.

HACKATHONS & COMPETITIONS

AI Innovation Hackathon — Finalist | IoT-Based Real-Time Health Monitoring on Azure

Feb 2025

- Developed a real-time health monitoring system using IoT sensors, Python, and Azure IoT Hub.
- Integrated SQL Database for structured data storage and built Power BI dashboards for live visualization.
- Reached finalist stage out of a competitive field, demonstrating end-to-end cloud and IoT expertise.

CERTIFICATIONS

AWS Solutions Architect — Associate Level

Simplilearn, Oct 2023

Introduction to Kubernetes

Simplilearn, Nov 2024

Fundamentals of DevOps On AWS

Simplilearn, Jul 2024

Microsoft Certified: Power BI Data Analyst Associate

Microsoft, June 2025
